

Advances in Application of Spectroscopic Techniques for Minerals Processing

Guest Editor:

Prof. Dr. Sarah Harmer-Bassell
Flinders University

Deadline for manuscript
submissions:

closed (1 February 2020)

Message from the Guest Editor

This **Special Issue** aims to publish recent research regarding advances in the spectroscopic analysis tools applied under mineral processing conditions. This includes mineral surface and bulk characterization, electrochemistry, instrument development, inline processing, sensors, statistical analysis tools and sample handling methods.

The keywords are:

Surface spectroscopy

X-ray microscopy

In situ analysis

Mineralogy

Comminution

Liberation

Physical Separation (gravity, electrostatic, magnetic)

Flotation (cells, bubble, surface chemistry, bioflotation)

Leaching (bioleaching)

Modelling and process simulation

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Geochemistry and Geophysics*) / CiteScore - Q2 (*Geology*)
