Mineral Textural and Compositional Variations as a Tool for Understanding Magmatic Processes

Guest Editors:

Prof. Silvio Mollo

Department of Earth Sciences, Sapienza – University of Rome, Rome, Italy

Dr. Francesca Forni

Asian School of the Environment, Nanyang Technological University, Singapore, Singapore

Dr. Flavio Di Stefano

National Institute of Geophysics and Volcanology (INGV), Rome, Italy

Deadline for manuscript submissions:

closed (31 December 2020)

Message from the Guest Editors

The main goal for this Special Issue is to collect different scientific contributions denoting how magma chamber processes and eruption dynamics studied either in laboratory or in nature can ultimately affect the evolutionary histories and petrographic complexities of igneous rocks.

The Keywords are:

- magma chamber processes
- eruption dynamics
- magma crystallization
- magma degassing
- magma mixing
- magma-crust interaction
- magma cooling and decompression
- mineral textural evolutions
- bulk rock and mineral compositional changes

IMPACT FACTOR 2.2

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Leonid DubrovinskyBayerisches Geoinstitut, University Bayreuth, D-95440 Bayreuth, Germany

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with <u>article processing charges</u> (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef,

CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Mineralogy) / CiteScore - Q2 (Geology)
