## Heterocycle Reactions

Collection Editor:

### Message from the Collection Editor

Dear Colleagues,

According to "Heterocyclic Chemistry" by J. A. Joule and K. Mills (Wiley, 5th Ed), "heterocyclic chemistry comprises at least half of all organic chemistry research worldwide". Many reactions proceed as predicted, while other reactions give unusual products, which perhaps do not fit the intended use but are nevertheless chemically interesting. Some reactions give more than one product, with selectivity tunable through optimization or biasing of reaction conditions. Often, interesting "side-products" are neglected in pursuit of a target compound.

This Special Issue welcomes the submission of any suitably fully characterized novel compound(s) from a given heterocyclic compound reaction. Please note that the reaction product does not necessarily have to be heterocyclic.

Prof. Dr. Fawaz Aldabbagh

## Message from the Editor-in-Chief

*Molbank* is a unique electronic journal that rapidly publishes very short articles, which typically encompass one compound per paper (“short notes”) as well as “communications”. The aim of this format is to prevent potentially useful scientific information from being lost. In many research groups, there are unpublished compounds that are available, which do not truly fit into a full paper or even a conventional short paper, e.g. because the main work in a series of compounds has already been published. Nevertheless, somebody else might be interested in just this particular compound. *Molbank* offers an excellent platform for preserving the aforesaid kind of information.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Reaxys](#), [CAPlus / SciFinder](#), and [other databases](#).

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.9 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2024).
