Message from the Guest Editors

Dear Colleagues,

Polyphenols are highly interesting natural products that can become innovative tools for pharmaceutical/cosmetic/nutraceutical research. This Special Issue aims to focus on chemistry approaches that try to achieve sustainability at the molecular level. Examples include the amelioration of extraction methods and chemical modifications to improve the solubility, bioavailability, shelf-life, and stability of polyphenols.

Dr. Francesca Aiello

Message from the Editor-in-Chief

Molbank is a unique electronic journal that rapidly publishes very short articles, which typically encompass one compound per paper (“short notes”) as well as “communications”. The aim of this format is to prevent potentially useful scientific information from being lost. In many research groups, there are unpublished compounds that are available, which do not truly fit into a full paper or even a conventional short paper, e.g. because the main work in a series of compounds has already been published. Nevertheless, somebody else might be interested in just this particular compound. Molbank offers an excellent platform for preserving the aforesaid kind of information.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Reaxys](#), [CAPus / SciFinder](#), and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2023).
