Deadline for manuscript submissions:

closed (30 April 2022)

# **Message from the Guest Editors**

Dear Colleagues,

Polyphenols are highly interesting natural products that can become innovative tools for pharmaceutical/cosmetic/nutraceutical research. This Special Issue aims to focus on chemistry approaches that try to achieve sustainability at the molecular level. Examples include the amelioration of extraction methods and chemical modifications to improve the solubility, bioavailability, shelf-life, and stability of polyphenols.

Molbank is a unique electronic journal that rapidly publishes very short articles, which typically encompass one compound per paper ("short notes") as well as "communications". The aim of this format is to prevent potentially useful scientific information from being lost. In many research groups, there are unpublished compounds that are available, which do not truly fit into a full paper or even a conventional short paper, e.g. because the main work in a series of compounds has already been published. Nevertheless, somebody else might be interested in just this particular compound. Molbank offers an excellent platform for preserving the aforesaid kind of information.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Reaxys, CAPlus / SciFinder, and other databases.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.9 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2024).
