Message from the Guest Editors

Dear Colleagues,

This Special Issue of *Molecules* is dedicated to showcasing recent advancements in the field of materials chemistry research. This Special Issue welcomes contributions not only from the Editorial Board Members (EBMs) but also from all researchers interested in the field of “Materials Chemistry”. Both original research articles and comprehensive review papers on theoretical or experimental studies covering the application of chemistry-based techniques to the study of materials, including materials synthesis, characterization, and properties, are welcome. The objective of this Special Issue is to highlight noteworthy investigations conducted within our section, and we aim to establish an attractive open access publishing platform for cutting-edge materials chemistry research.

Deadline for manuscript submissions:

30 July 2024

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
