Message from the Guest Editors

Dear Colleagues,

This Special Issue is dedicated to the 60-year anniversary of the foundation of the Laboratory of Analytical Chemistry (School of Chemistry, Aristotle University of Thessaloniki, Greece). Our intention is to launch a Special Issue where colleagues not only from the Laboratory of Analytical Chemistry but from the other Labs of the School of Chemistry will contribute high-quality research/review articles to celebrate the 60 years since the foundation of our lab. However, we aim to expand the publications of this Special Issue and invite former and present collaborators/colleagues from all over the world. On this basis, this Special Issue will not focus solely on analytical chemistry submissions but will cover broader topics of chemical science.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
