Department of Materials Science,  
University of Patras, Patras,  
Greece

**Dr. Emmanuel Paspalakis**

Department of Materials Science,  
School of Natural Sciences,  
University of Patras, 26504 Rio,  
Patras, Greece

**Dr. Dionisis Stefanatos**

Department of Materials Science,  
School of Natural Sciences,  
University of Patras, 26504 Rio,  
Greece

Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editors

The topic of light–matter interactions has been revolutionizing the science and technology of modern society in an unprecedented way. Interactions between light and matter are of vital importance since they involve original scientific aspects concerning chemistry and physics. Furthermore, these interactions offer an irreplaceable way to investigate physical and chemical phenomena to associate applications of novel materials on the nanoscale. The field continues to grow at a rapid pace, bringing many new exciting discoveries almost every day. We are organizing this Special Issue to attract broad attention on the light–matter interactions of novel physical and chemical phenomena.

The Special Issue on Recent Advances in Light–Matter Interaction in Chemistry and Physics aims to highlight recent computational and theoretical advancements related to light–matter interactions in relevant research areas within chemistry and physics.

Manuscripts can be submitted in the following formats: full research papers, communications, and reviews.

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Thomas J. Schmidt**

Institute of Pharmaceutical  
Biology and Phytochemistry,  
University of Münster,  
Corrensstrasse 48, D-48149  
Münster, Germany

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
