Message from the Guest Editor

Dear Colleagues,

This Special Issue, “Power of Microbes in Pollutant Degradation”, aims to cover every aspect of biodegradation potential, development and solutions regarding the microbes associated with pollutants. In addition, approaches using metagenomic and bioinformatics, together with emerging high-throughput sequencing technologies (genomic/proteomic), have provided insight into the complex interactions between different microbial communities and their metabolic potentials. This could be exploited further for bioremediation strategies in the removal of pollutants from the environment.

This Special Issue provides an opportunity for researchers to present their latest work addressing the fundamental aspects and applied research within this field.

Full articles, short communications, and review articles are welcome.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
