Deadline for manuscript submissions:

closed (10 July 2024)

Message from the Guest Editor

Dear Colleagues,

With the development of Nanotechnology, nanomaterials have become one of the most promising topics in different fields, such as physics, chemistry, engineering, and biology. Nanomaterials have the potential for revolutionizing the ways in which materials and products are created and the range and nature of functionalities that can be accessed. It is well known that the phases, sizes, and morphologies of nanomaterials have great influence on their properties and potential applications. Electrochemical applications play key roles in current diverse nanomaterial devices and targets. Recent developments in functional nanomaterials offer new possibilities of improving the performance of electrochemical sensors. With these advances in mind, we would like to invite you to contribute to this Special Issue of *Molecules* titled “Nanomaterials: Synthesis, characterization, and electrochemical applications”. It is our hope and aim to present your valuable, unpublished research to a worldwide audience.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
