Deadline for manuscript  
submissions:

**30 June 2024**

### Message from the Guest Editor

Dear Colleagues,

Over the past decade, great efforts have been invested in developing covalent organic frameworks (COFs). Due to their notable intrinsic features, such as a predesignable and highly ordered structure, low density, exceptional stability, high surface area, and readily adjustable pore size and chemical environment, COFs have been proposed as ideal materials for wide-ranging applications, including in gas adsorption and separation, optoelectronics, drug delivery, heterogeneous catalysis, sensing, and energy storage. In addition, due to COFs' processability, COF-based composites/devices, including membranes, films, electrodes, etc., have recently received substantial attention.

This Special Issue is inspired by the growing interest and application of COFs and aims to identify and review the recent developments and breakthroughs in these fields. We invite original contributions as well as review articles relating the synthesis, characterization, and application of COFs and hope to provide new insights and ideas that prompt the further development of COFs.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (Chemistry (miscellaneous))
