Science, Shanghai 201620, China

Deadline for manuscript  
submissions:

**closed (31 July 2024)**

### Message from the Guest Editors

Dear Colleagues,

Quite a few scientific areas have significantly benefited from the introduction of nanotechnology, and it is especially noteworthy in the development of new drug substances and products. Over the last few years, the application of nanotechnology for medical purposes has attracted great attention in the use of nanomaterials for the diagnosis, monitoring, control, prevention, and treatment of diseases. Their unique size-dependent properties make these materials superior and indispensable in addressing the growing demands of enhanced human life expectancy and quality of life. In addition, the combination of several components can not only coat the surface of nanoparticles in order to enhance their biocompatibility and stability but may also provide the substrate for functional nanoparticles growing on their surface to reach multifunction.

This research topic intends to invite researchers to contribute studies on recent advances in nanocomposites for drug delivery, diagnosis, and the like, which enables a better understanding of the role of nanocomposites as a theranostic agent.

Prof. Dr. Yanyan Jiang

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
