Deadline for manuscript  
submissions:

**closed (31 March 2022)**

### Message from the Guest Editor

Dear Colleagues,

The design and development of new anticancer agents with selectivity for tumors and their metastases is a very broad and popular topic in the new approach to medicinal chemistry. The aim of this Special Issue is to provide a wide spectrum of the newest strategies in drug development explored in research teams. First, we want to identify the most popular structures present in many anticancer compounds known as privileged structures. Additionally, we want to collect the most important molecular targets (signaling pathways, proteins involved, receptors, etc.) which are of interest to researchers focused on anticancer therapy.

Dr. Anna Mrozek-Wilczkiewicz

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
