Message from the Guest Editors

Dear Colleagues,

Functional foods contain bioactive ingredients, including polyphenols, fatty acids, carotenoids, steroids, and polysaccharides, that provide health benefits beyond basic nutrition. These biochemical compounds possess antioxidant, anti-inflammatory, and other beneficial properties. In this way they contribute to various aspects of human health, including cardiovascular health, immune function, gut health, and disease prevention. Furthermore, incorporating functional foods into the diet could promote overall wellbeing and reduce the risk of chronic disease.

1. Profiling of biochemical compounds in various functional food.
2. Pharmacological properties of bioactive compounds.
3. Application of bioactive ingredients in models.
4. Clinical and epidemiological studies of biochemical compounds.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
