Message from the Guest Editors

Dear Colleagues,

For two decades, deep eutectic solvents (DES) have been competing with ionic liquids due to lower production costs, lower toxicity, and favorable biodegradability. Many studies have demonstrated their usefulness in a wide range of applications, including extraction, separation, and catalysis, in the pharmaceutical industry, depending on the physicochemical properties of DES. Therefore, the Special Issue “Deep Eutectic Solvents: Properties and Applications as Green Solvents” is devoted to the collection of up-to-date original and review papers in this field. In the original articles, both experimental and computational research on pure DES and their mixtures with other solvents are welcome.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
