Message from the Guest Editors

Dear Colleagues,

This Special Issue of Molecules is dedicated to recent advances in bioorganic chemistry research areas and comprises a diverse selection of exclusive papers of the Editorial Board Members (EBMs) of the Bioorganic Chemistry Section. It focuses on highlighting recent interesting investigations conducted in the laboratories of our section's EBMs and represents our young section as an attractive open-access publishing platform for bioorganic chemistry research data

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
