Message from the Guest Editor

Dear Colleagues,

The adverse effects of chemical substances on the environment are a multifaceted problem, not only from an ecotoxicological point of view but also from multiple other perspectives, involving human populations. This Special Issue will collect contributions on state-of-the-art research, with particular attention to studies modeling ecotoxicological properties, environmental fate and behavior, propagation of the effects of contaminants towards human beings, integration of models for hazard and exposure, and the mixture effect. The challenge to minimize the impact of contaminants may benefit from in silico modeling, and your ideas will contribute.

Prof. Dr. Emilio Benfenati

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
