Deadline for manuscript submissions:
28 February 2025

Message from the Guest Editor

Dear Colleagues,

This Special Issue focuses on the application of metal–organic framework (MOF) materials in advanced oxidation processes (AOPs), specifically targeting volatile organic compounds (VOCs) in the atmosphere and emerging pollutants in water bodies. It comprehensively covers topics such as novel synthesis methods for MOFs and the latest evaluation techniques for pollutant degradation performance. The research presented in this Special Issue provides valuable insights into the application of MOF materials in the field of AOPs, contributing to the development of efficient and sustainable atmosphere and water treatment technologies.

Dr. Xiaodong Zhang

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.
Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
