### Message from the Guest Editor

Dear Colleagues,

Molecular imaging is revolutionizing drug development. PET tracers can demonstrate kinetic and dynamics of new molecules, their receptor engagement, and downstream effects. This Special Issue aims to provide a forum for dissemination of the latest information on new approaches and methods of using molecular imaging in the drug development process.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
