Deadline for manuscript  
submissions:

**closed (30 November 2022)**

### Message from the Guest Editor

Dear Colleagues,

This special issue aims to demonstrate research advancement of NMR-based metabolomics in methodological development and its applications. Topics in methodological development include the detection of biofluids by HR-NMR and tissues by HR-MAS NMR and/or MRS, spectral processing and data analysis, machine learning, and network construction; applications focus on clinical disease within human and animal and food analysis, such as disease diagnosis, pharmacology, therapeutic evaluation, disease classification, food chemistry, origin identification and authenticity, food safety, quality control, and nutritional analysis of foods. All article types, including original research, short communications, and reviews, are welcome.

Prof. Dr. Jianghua Feng

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
