Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editor

Dear Colleague,

Marine natural products have the characteristics of novel structure, high activity, and high druggability and are important resources for new drug research and development in the pharmaceutical industry. Marine microorganisms are the most dominant and characteristic marine living resources. Research on marine microbial active substances is the basis of innovative drugs, and also the starting point of chemical and biological synthesis of active substances. Marine microorganisms can be industrialized through large-scale fermentation. Chemical synthesis and biosynthetic technology will provide a new way for the rapid development of the marine microbial industry. It is an important breakthrough to solve the bottleneck of marine drug sources.

We invite you to contribute a paper on Marine Microbial Metabolites, you are welcome to visit the [website](#), and submit your paper [here](#). Any questions, please feel free to contact the managing editor Larry Li ([larry.li@mdpi.com](mailto:larry.li@mdpi.com)).

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Thomas J. Schmidt**

Corrensstrasse 48, D-48149  
Münster, Germany

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
