Deadline for manuscript
submissions:

closed (30 September 2021)

Message from the Guest Editor

Cardiovascular disease (CVD) is the leading cause of death worldwide, and natural products are important sources of cardiovascular drug discovery. This Special Issue focuses on the identification and use of selected natural products (including bioactive components from Chinese herbal medicine, Ayurveda, nutraceuticals, and food supplements) for use in the prevention of CVD. Subjects of interest include, but are not limited to: new drug lead identification, new target in cardiovascular drug discovery, toxicity assessments, pharmacokinetic studies of compound bioavailability, and mechanisms of action of repurposed natural products in the initiation and promotion/progression stages of CVD. Future directions for natural product-derived drug discovery for more effective CVD prevention are discussed.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
