Tecnologie Biologiche, Chimiche
e Farmaceutiche, Viale delle
Scienze, Edificio 17, 90128
Palermo, Italy

Dr. Antonio Monari

Theoretical Physics and
Theoretical Chemistry Laboratory
(LPCT), University of Lorraine and
CNRS, Nancy, France

Deadline for manuscript
submissions:

closed (30 June 2022)

Message from the Guest Editors

In this Special Issue, we invite the submission of short communications, original research articles, and reviews focusing on the biophysical determination and regulation of canonical and noncanonical nucleic acid/protein complexes, including, among others, histones or histon-like proteins, transcription factors, and repair and duplication enzymes. The interaction of small molecules/metal complexes with canonical/noncanonical nucleic acid structures, as well as the effect of DNA lesions on the molecular structure, will also constitute a particular focus of this issue. Moreover, research contributions combining molecular modeling along with experimental structural, photophysical, and molecular biology techniques (e.g., Cryo-EM, X-ray, UV-Vis spectroscopy, circular dichroism, FRET, fluorescence analyses, etc.) able to sinergically shed light into the drug/target binding mechanism are particularly welcomed.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
