Message from the Guest Editor

Dear Colleagues,

Natural Products have been a long-standing robust source of anti-inflammatory molecules for decades. Plants in particular, have demonstrated a varying level of chemistry associated with this activity, including flavonoids, terpenes, phenolics, saponins and many more unprecedented structure classes. This special issue is dedicated to capture the discovery of new secondary metabolites identified from natural sources that has the potential of exhibiting anti-inflammatory properties. Original research papers, communications, review articles are all welcomed.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
