

## PROTACs as Dual Motif Dsmall Molecule Drugs: Past, present and future of Targeted Protein Degradation in Development

Guest Editors:

**Dr. Sridhar Radhakrishnan**

**Dr. Li Chai**

**Prof. Dr. Daniel G. Tenen**

**Dr. Susumu Kobayashi**

Deadline for manuscript  
submissions:

**closed (1 November 2022)**

### Message from the Guest Editors

Dear Colleagues,

In this Special Issue, we invite researchers to submit their latest research findings or review articles related to PROTAC-type molecules and other multiple targeting single molecule drugs for treatment of cancer and other diseases. Different classes of ligands for target protein binding, E3 ligase binding, and chain length of the spacers will be helpful for readers/researchers in this type of drug development, and hence, we encourage submissions discussing these aspects as well. Apart from conventional bifunctional target protein degraders, we invite articles based on molecular glues, large molecule-based degraders, and other less common unconventional degraders.

Dr. Sridhar Radhakrishnan

Prof. Li Chai

Prof. Daniel G. Tenen

Prof. Susumu Kobayashi

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
