Nutrition, University of Life
Sciences, 60-637 Poznań, Poland

Deadline for manuscript
submissions:

closed (15 April 2024)

Message from the Guest Editor

Dear Colleagues,

Due to the success of the first edition of the Special Issue “Analysis of Bioactive Compounds in Food”, we have launched a second edition.

The methods of bioactive compound analysis are time-consuming and conducted with extraction, purification, separation, and identification. Most methods described in literature use chromatographic techniques to detect these phytochemicals and mass spectrometry to determine their chemical structures. Because of their significant differences, it is not easy to find a unique method for their simultaneous analysis.

In this Special Issue, we invite researchers to contribute original research and review articles that analyze and describe new bioactive compounds in raw material and food products, the mechanisms of their digestion, stability during food production and storage, and formation of derivatives and metabolites. Special interest is devoted to their effects for the prevention and treatment of civilization diseases.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
