# **Pyrazine Derivatives**

Guest Editor:

#### Prof. Dr. Maria João Queiroz

Centre of Chemistry (CQUM), Campus de Gualtar, University of Minho, 4710-057 Braga, Portugal

Deadline for manuscript submissions: closed (30 June 2020)

## Message from the Guest Editor

Dear Colleagues,

Pyrazine and its derivatives constitute an important class of heterocyclic compounds that are present in many natural products and can be synthesized chemically or biologically. Pyrazine-containing drugs are also extensively used for different therapeutic purposes. Besides that, pyrazine derivatives have applications as dyes, electroluminescent materials, organic semi-conductors, and as suitable ligands in coordination chemistry.

The pyrazine nucleus is present in many polycyclic compounds of biological significance such as quinoxalines and phenazines and bio-luminescent natural products such as pteridines and flavins. Condensed systems containing pyrazine and other heterocyclic scaffolds have given rise to compounds with several biological activities.

Researchers in the field are cordially invited to submit relevant manuscripts to the synthesis of pyrazine derivatives and their use in the construction of condensed systems for a Special Issue, 'Pyrazine Derivatives', within the journal Molecules. Moreover, contributions regarding their potential applications are also welcome.

## **Editor-in-Chief**

#### Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
