Deadline for manuscript submissions:
closed (30 June 2021)

Message from the Guest Editor

Dear Colleagues,

Heterocyclic chemistry is a vast and important subject. Many different heterocyclic systems have now been explored. In the last century, a family of the structures at the borderline between organic and inorganic chemistry, which are characterized by an unusually high ratio of heteroatoms (sulfur and nitrogen) to carbon, was discovered. It turned out that these structures can be of practical interest as semiconductors, liquid crystals, and agrochemical, antimicrobial, antivirus, and similar objects. This Special Issue will focus on the advances in the synthesis, reactivity, and uses of polysulfur- and sulfur-nitrogen heterocycles.

Prof. Dr. Oleg A. Rakitin

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt
Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.
Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
