Message from the Guest Editor

Dear Colleagues,

The increasing incidence of malignancies worldwide coupled with the current global health emergency calls the scientific community to make new, effective, and immediate drug discovery efforts in the field. After the successful first edition of the Special Issue “Design, Synthesis and Applications of New Anti-Cancer Agents”, we determined to produce a second edition aiming to disclose brand new findings and advances in the design and synthesis of target-based anti-cancer agents, as well as information on new approaches, methods, and delivery systems for the improvement of the pharmacological profile of the drugs currently available on the market.

Prof. Nicola Micale

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
