### Message from the Guest Editors

Dear Colleagues,

This Special Issue welcomes the submission of original research and/or review articles on drug discovery and development related to the advancements of in vitro, in vivo, and ex vivo ADME and DMPK, in vitro to in vivo correlation and extrapolation (IVIVC/E), biotransformation, drug–drug interactions, and pharmacokinetic interactions related to drug-metabolizing enzymes and drug transporters. This Special Issue will promote a quantitative and mechanistic understanding of the pharmacokinetic interactions of novel drug candidates in biological systems.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
