Message from the Guest Editor

Dear Colleagues,

Terpenes, their derivatives and general isoprenoids, as natural secondary metabolites, play stable and growing roles in Flavours, Fragrances and Pharmaceuticals, and branch out into an increasing number of other fields. Their importance is based, i.a., on the fact that they are mostly bound to renewable sources, which makes them valuable within a circular economy. Terpenes and steroids are also a cause of stereochemistry, regioselectivity, chirality, and many other features and disciplines within science, development, and the industry on a scope which is indispensable.

This Special Issue aims to underline the current developments in all fields that are connected to terpene research and utilization.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
