Deadline for manuscript  
submissions:

**closed (31 December 2022)**

### Message from the Guest Editors

Dear Colleagues,

Thin-film nanomaterials are a quickly growing area of research and technology. Such nanomaterials include 2D materials (graphene, MoS<sub>2</sub>), nanotubes, nanowires, and nanofibers. Often, these materials must be additionally modified (e.g., by thin layers and films) in order to induce specific properties, for example, to immobilize antibodies, DNA, proteins, etc. These thin-film-modified nanomaterials open a new area of research for biosensors, tissue engineering, drug delivery, and many others. In this Issue, interdisciplinary research in the field of nanomaterials for biosensing, enhanced cell adhesion, wound therapy, theranostics, cancer treatment, antimicrobial layers, and biomolecule detection are warmly welcome.

## Editor-in-Chief

**Prof. Dr. Thomas J. Schmidt**

Institute of Pharmaceutical  
Biology and Phytochemistry,  
University of Münster,  
Corrensstrasse 48, D-48149  
Münster, Germany

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
