

## Thermal and Photocatalytic Analysis of Nanomaterials: 2nd Edition

Guest Editors:

**Dr. Imre Miklós Szilágyi**

Department of Inorganic and Analytical Chemistry, Budapest University of Technology and Economics, Szent Gellért tér 4, H-1111 Budapest, Hungary

**Dr. Klára Hernádi**

Institute of Physical Metallurgy, Metal Forming and Nanotechnology, University of Miskolc, 3515 Miskolc, Hungary

**Dr. Ottó Horváth**

Research Group of Environmental and Inorganic Photochemistry, Center for Natural Sciences, Faculty of Engineering, University of Pannonia, P.O. Box 1158, H-8210 Veszprém, Hungary

Deadline for manuscript submissions:

**31 December 2024**

### Message from the Guest Editors

The thermal properties of nanomaterials are important in both their preparation and application. Several nanostructured compounds are prepared by thermal decomposition of their precursors, and detailed knowledge of the decomposition scheme is vital to be able to control the structure, composition, and morphology of the as-prepared nanomaterials.

Photocatalytic synthesis is also a major field of green chemistry. It ranges from artificial photosynthesis by converting CO<sub>2</sub> and H<sub>2</sub>O into organic raw molecules to producing photocatalytic synthetic versions of more sophisticated organic processes. There are many exciting materials and processes appearing in contemporary photocatalytic research, including photonic bandgap structures and all-organic photocatalysts. Using computation chemistry and applying extreme laser infrastructure to understand photon absorption, excitation, and dissipation processes and the photochemical reactions that occur therewith are also hot topics in this field.

The present Special Issue aims to collect studies, and their results, comprising the latest developments on the thermal and photocatalytic properties of nanomaterials.

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Thomas J. Schmidt**

Institute of Pharmaceutical  
Biology and Phytochemistry,  
University of Münster,  
Corrensstrasse 48, D-48149  
Münster, Germany

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
