Message from the Guest Editors

Dear Colleagues,

Multicomponent reactions are highly convergent processes that permit the synthesis of complex molecules in a simple procedure. This synthetic methodology has been widely used in different research fields, such as medicinal chemistry, combinatorial chemistry, green chemistry, or materials chemistry. In particular, multicomponent reactions are well suited for diversity-oriented chemistry, constituting an excellent tool for exploring chemical molecular space. Multicomponent chemistry is now more active than ever, and new approaches are being developed every day to respond to the challenges of contemporary organic chemistry.

Biology and Phytochemistry,
University of Münster,
Corrensstrasse 48, D-48149
Münster, Germany

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
