### Message from the Guest Editors

Since the library of Zn(II) and Cd(II) coordination networks is numerous and continues growing rapidly demonstrating fascinated crystal structures and impressive properties, the Editorial Board of Molecules, thus, decided to devote a Special Issue of the journal to this topic. This Special Issue is expected to provide an excellent platform to report results that highlight the synthesis, crystal structures in combination with the spectrum of impressive properties of Zn(II) and Cd(II) coordination polymers. As Guest Editor, I cordially invite scientists from various fields to submit articles which cover a broad range of subjects in coordination polymer chemistry.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
