## Analysis of Residues in Environmental Samples

Guest Editors:

### Dr. Ewa Szpyrka

Department of Biotechnology,  
Institute of Biology and  
Biotechnology, College of  
Natural Sciences, University of  
Rzeszów, 35-310 Rzeszów,  
Poland

### Dr. Magdalena Słowik- Borowiec

Department of Biotechnology,  
Institute of Biology and  
Biotechnology, College of  
Natural Sciences, University of  
Rzeszów, 35-310 Rzeszów,  
Poland

Deadline for manuscript  
submissions:

**closed (31 December 2022)**

### Message from the Guest Editors

Dear Colleagues,

The state of the environment is a very important issue for ourselves and future generations. Due to human activity, our planet is constantly polluted with many substances that are dangerous to the health of people, animals, and plants, as well as to the state of water and air. Many of these substances are persistent pollutants that decay for years. A very important issue is the development of advanced analytical methods that allow the determination of these substances with very high sensitivity, even for trace levels in environmental samples of various types.

We are pleased to invite you to publish original and review papers in the field of trace pollutant analysis: heavy metals, pesticides, organic, and other persistent contaminants in environmental samples. Articles on new, advanced methods with application to analysis of such substances are also welcome. Furthermore, toxicological assessment of contaminants present in environmental samples to human health is also of interest. In this Special Issue, original research articles and reviews are welcome.

We look forward to receiving your contributions.

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Thomas J. Schmidt**

Institute of Pharmaceutical  
Biology and Phytochemistry,  
University of Münster,  
Corrensstrasse 48, D-48149  
Münster, Germany

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
