Message from the Guest Editor

Dear Colleagues,

There are growing needs for the new anti-protozoan agents to treat the neglected tropical diseases (NTDs). So far, numbers of lead compounds have been discovered from natural sources, and some of them were successfully developed as anti-protozoan drugs. However, the emergence of resistance against existing drugs or unavailability of treatments for some of the NTDs still force us to search for new anti-protozoan drugs. With this situation in mind, in this Special Issue on “Development and Application of Anti-protozoan Agents”, we would like to get together for the development of new treatments against NTDs.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
