Message from the Guest Editors

Dear Colleagues,

Recently, there has been a growing research interest in the functionality and bioefficacy of bioactive ingredients using different techniques and the incorporation of these materials into various food products, known as 'functional foods'. The bioactive ingredients include a diverse class of bioactive compounds such as polyphenols, carotenoids, vitamins, minerals, essential oils, and flavors, as well as bioactive live organisms (i.e., probiotics).

This Special Issue of 'Bioactive ingredients in the Food Matrix' aims to bring together pure and applied research papers on various aspects that have been experimented and suggested for the aforementioned broad group of bioactive compounds and bioactive live organisms (i.e., probiotics).

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
