### Message from the Guest Editors

Dear Colleagues,

Professor Jean-Pierre Majoral has played a key role in the development of dendrimer field by providing a platform in designing a diverse range of nanomaterials. He has received numerous awards including *Award* of the French Chemical Society, *Coordination Chemistry Division*, *Prix Jecker Award* of the French Academy of Sciences; *Wittig Grignard Award* of the German Chemical Society; *von Humboldt Foundation Award*; etc. He has published more than 660 papers, and is also the co-founder of two companies Dendris, and Biodendrimer International.

Professor Majoral will celebrate his 80<sup>th</sup> birthday in 2021, and *Molecules* is pleased to host a special issue entitled “*Dendrimers in Medicine: Theme Issue Honoring Professor Jean-Pierre Majoral on his 80<sup>th</sup> Birthday*” to congratulate him and celebrate his outstanding contributions to the area of dendrimers.

We invite scientists to join us in celebrating Professor Jean-Pierre Majoral’s exceptional achievements by contributing original research articles as well as reviews to this special issue.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
