Message from the Guest Editor

Dear Colleagues,

This Special Issue will highlight recent advances in green chemistry in general. To date, a wide variety of green chemistry approaches have been developed and used for organic reactions. We encourage submissions that explore novel green chemistry approaches that can impact society. Papers that focus on development of new green chemistry metrics are also encouraged.

We invite submissions of original research and review articles for this Special Issue of Molecules.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
