Message from the Guest Editor

Dear Colleagues,

Metal oxides can be incorporated into a variety of systems and are the basis for many smart functional materials. This Special Issue aims to collect research and review papers on different functional metal oxides with the focus on their functionality at the atomic levels. The papers can present topics involved in the synthesis, characterization, and/or application of metal oxides.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
