Message from the Guest Editor

Dear Colleagues,

Naturally occurring organic compounds such as lipids and alkaloids have great potential not only in therapeutic applications, but also in others such as cosmetics. These natural compounds can be used as native compounds or their properties can be modified and fine-tuned for different applications. Alkaloids and lipids are suitable candidates for therapeutic and cosmetic applications. Lipid-derived amphiphiles have great ability to self-assemble in nanostructures. The inherent hydrophobic nature of lipids makes them ideal for encapsulation of therapeutics, including alkaloids, and they are released in a controlled fashion at the desired site. This Special Issue focuses on the use of alkaloids and lipids in therapeutic and cosmetic applications.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
