Deadline for manuscript  
submissions:

**closed (31 December 2023)**

### Message from the Guest Editor

Over the last decade, more than 1000 new marine natural products (MNPs) have been discovered from the metabolites of marine organisms. Most MNPs exhibit unique skeletons and marvelous biological activities, which have received increasing attention as potential drugs. This has partly been driven by new developments in analytical technology, spectroscopy and high-throughput screening, and partly driven by a broad realization that competing technologies such as combinatorial chemistry have failed to deliver new drug leads in significant numbers. This Special Issue of *Molecules* aims to provide an intellectual platform for scientists to publish reviews, original research papers, short communications, etc., covering the topics of bioactive MNPs, biological activities, and underlying molecular mechanisms, as well as related disciplines of topical interest to drug development from MNPs.

We kindly invite you to contribute an excellent paper to the SI. You are welcome to visit the [website](#) and submit your paper [here](#). If you have any questions, please feel free to contact Cecilia Li ([cecilia.li@mdpi.com](mailto:cecilia.li@mdpi.com)), the managing editor from Molecules editorial office.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
