### Message from the Guest Editors

Dear Colleagues,

You are invited to contribute original articles as well as survey articles related (but not limited) to the following topics:

- Design of biomaterial-based drug delivery systems;
- Relationships between material, structure, and biopharmaceutical properties;
- Micro- and nano particles for drug encapsulation and controlled release;
- Elettrospinning as a tool for controlled drug release;
- Outline of the mechanisms involved in targeted drug delivery.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
