Message from the Guest Editors

Dear Colleagues,

You are invited to contribute original articles as well as survey articles related (but not limited) to the following topics:

- Design of biomaterial-based drug delivery systems;
- Relationships between material, structure, and biopharmaceutical properties;
- Micro- and nano particles for drug encapsulation and controlled release;
- Elettrospinning as a tool for controlled drug release;
- Outilne of the mechanisms involved in targeted drug delivery.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
