Message from the Guest Editors

This Special Issue of *Molecules* is dedicated to Professor John B. Goodenough (born July 25, 1922, Jena, Germany), American physicist, who won the 2019 Nobel Prize for Chemistry for his work on developing lithium-ion batteries. It will consist of communications, original research articles, and review articles related to magnetic properties and alkali ion batteries as well as anecdotes on John Goodenough.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
