### Message from the Guest Editors

Food packaging is an essential issue in order to ensure food safety. In this Special Issue on food packaging, we will essentially focus on: (i) identification of the main raw material studied of food packaging materials, (ii) research on biopolymers to produce innovative bio-packaging, (iii) the application of nanotechnology for food packaging, (iv) the incorporation of bioactive compounds in the polymeric food packaging matrix, and (v) understanding the effect of innovative packaging materials on food quality and food shelf-life. Consequently, this Special Issue of *Molecules* is dedicated to original research and review articles that cover the latest findings on bio-packaging materials, new eco-friendly processes, and composite biomaterials incorporated with natural additives and their influence on quality and shelf-life of food.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
