Deadline for manuscript
submissions:

closed (31 May 2022)

Message from the Guest Editor

Dear Colleagues,

Physicochemical and biological properties (e.g., solubility, stability, absorption, distribution, etc.) of pharmaceuticals, which determine their clinical performance, are strictly related to their structures. This Special Issue of *Molecules* welcomes papers on pharmaceuticals as well as on new druggable candidates (including their solvates, cocrystals, salts, etc.), focusing on their molecular and crystal structures. Manuscripts reporting structural data acquired from experimental and/or computational methods are welcome. Discussion on the relationship between structures and properties are highly appreciated.

Prof. Dr. Paola Paoli

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
