Sulfur Compounds and Human Health

Guest Editors:

Dr. Peter Rose

School of Biosciences, University of Nottingham, Loughborough, Leicestershire LE12 5RD, UK

Prof. Dr. Yi Zhun Zhu

1. School of Pharmacy and State Key Lab. of Quality Research in Chinese Medicine, Macau University of Science and Technology, Macao 999078, China

2. Shanghai Key Laboratory of Bioactive Small Molecules, Department of Pharmacology, School of Pharmacy, Fudan University, Shanghai 201203, China

Message from the Guest Editors

Sulphur compounds are widely distributed in nature with many acting on cell signalling systems in human cells and tissues. New biochemical properties for these compounds are often described in the literature and the identification of new sulphur species common place. Many of these molecules are promising drug candidates, are potential functional food ingredients, are potential targets in plant breeding programmes to enhance levels, or as chemical tools that can be used to manipulate human sulphur metabolic networks. It is only now that we are beginning to understand the true impact of these compounds on human health via their ability to influence important cell signalling systems linked to health.

This Special Issue welcomes original research and reviews of literature on all aspects of the sulphur compounds and human health.

Deadline for manuscript submissions:

closed (31 December 2019)

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical
Biology and Phytochemistry,
University of Münster,
Corrensstrasse 48, D-48149
Münster, Germany

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
