Message from the Guest Editors

Dear Colleagues,

Despite the development of more targeted and less toxic drugs, traditional chemotherapy with platinum-based drugs is still one of the gold standard approaches for the treatment of cancer. The aim of this Special Issue is to collect and summarize new ideas and future trends in platinum-based complexes and materials, including compounds with bioactive ligands, multifunctional drugs, prodrugs, drug delivery systems, and theranostics metal complexes.

Prof. Dr. Mauro Ravera

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
